# I-INCE Investment Policy

I-INCE maintains savings accounts as part of its financial strategy. The primary goal of I-INCE investments/savings shall be the preservation of assets to support general operations in the event of unexpected reductions in cash flow. For that purpose, the goal of the fund shall be to grow and maintain an invested reserve amount equal to at least two years of typical expenses.

A secondary goal for the fund is to generate funding to support the mission of the society through support of I-INCE technical activities, sponsorship of I-INCE symposia, lectures, publications, and programs for students and young professionals.

The fund investments shall be considered low risk and all investments shall be made in Euros. The balance with any account shall not exceed €100,000 or maximum insured at the hosting financial institution. As an organization run on a voluntary basis, our policy should endeavor to be executed with limited effort by our officers to set up and maintain.
