

Title : Development and Outreach report for 2021+  
Author : Gijsjan van Blokland  
Date : August 8, 2022  
For : I-INCE Board meeting August 2022

### *Report 2021:*

In 2021 the mission and vision statement was endorsed by the board and published on the I-INCE website. As a first consequence DevOut activities focused on updating the website of I-INCE in collaboration with Eion King, the newly appointed webmaster. A proposal for the content of the new website [2] was circulated among the board and accepted.

Continued frequent contacts with the editor of NNI resulted in a continuation of the series on EU R&D projects and the start of a series of special issues on specific topics. The Spring issue of 2022 was dedicated to motorcycle sound with contributions from manufacturers, environmentalists, governments and type approval consultants (thanks to the In2021 special session on Motorcycle noise). For spring 2023 an issue on the noise aspects of the energy transitions is being discussed.

Activities in 2022+ will be dedicated to:

1. Contributing to the content of the website with educational material and developments around the globe. For that an editorial board is planned with apart from Eion and myself, Kerstin Persson Waye, Dana Lodico, Davi Akkerman, Bob Bernhard and John Davy.
2. Continued support of the NNI editor in improving the impact of NNI.
